

mechanical & electrical installations

- Air Conditioning
- Public Health Services
- Power
- Lighting

We provide full design and build mechanical and electrical solutions. Through our specialist consultants we can create the optimum scheme to suit your office environment and budget. We can offer ideal solutions including:

Air Conditioning

The design of new or the redesign and alteration of existing installations to suit your scheme. The addition of supplementary cooling to comms rooms and meeting spaces.

Public Health Services

The design and installation of plumbing services from simple kitchen installations to complex wet rooms and multi user shower facilities.

Power

The design and installation of low and high voltage power, underfloor busbar systems and flexible trunking solutions.

Lighting

The design of new or the redesign and alteration of existing modular lighting systems. The installation of feature lighting to enhance and accentuate your design scheme.
