

technology & infrastructure

- Structured Cabling
- IT & Telephone Systems
- Audio Visual

Through specialist teams, Belfort Services are able to design and manage all aspects of information technology.

Structured Cabling

As the foundation for all IT infrastructures, structured cabling forms the integral component for all your IT services. We design and install bespoke structured cabling systems including:

- CAT 5e
- CAT 6
- CAT 7
- Secure Wireless WAN

IT & Telephone Systems

Partnering with major IT suppliers and distributors to ensure cost effective solutions, whether it's a standalone or fully networked system we offer installation together with back up support for all your IT requirements.

We supply and install digital telephone systems from a range of major suppliers.

Audio Visual

Our Audio Visual partners can provide a full design and installation package to suit your needs including video conferencing, plasma/LCD screens, projector systems and satellite/cable television.
